Quality Towing was started in 1994 with the idea that providing top level professional service in a timely manner should be the priority. Providing fast service to stranded motorists to help them get on with their day is of the utmost importance. We all know how hectic life in the San Francisco Bay Area can be. It is our job to make it a little easier when a motorist needs assistance.

The drivers from Quality Towing have all been **CTTA** (California Tow Truck Association) and Wreckmaster trained & certified. The owner has been **TRAA** (Towing and Recovery Association of America) certified and has in turn passed the high level of training onto the tow truck operators. Between three drivers there is more than 60 years combined towing experience. Our uniformed, clean, courteous, friendly tow truck operators are there quickly and provide the fastest professional service possible.

We are located in the middle of the peninsula, travel times to SF are around 30-45 minutes and the same for San Jose. The company started in San Mateo, moved to San Carlos, then Belmont and now we are back in the heart of San Mateo at **2111 Palm Ave. San Mateo**, California. Being on the Bay Area Peninsula is important to providing the fastest, most professional service to commuters on the road. We will always be here on the peninsula for you.

Constantly updating our equipment, Quality towing is able to provide a fast and comfortable service to you the consumer. Whether you drive an expensive luxury Car, a daily commuter, lowered custom, lifted monster truck, motorcycle or even a motorhome we have the TowTruck to handle the job. Our service calls consist of jump starts, unlocks, tire changes and fuel delivery. Quality Towing handles all your service calls in a expeditious manner. We are here for you 24 hours a day and seven days a week! **(650) 341-6555**

Our long term goal is to be the best and biggest Towing and Road service company in the San Mateo area. That type of accomplishment does not happen overnight though, it takes time to build a towing operation into the best and biggest. We are already half way there. Now all we need to do is become bigger, after all, we are already the best!
